

THE SWAMP WHITE (QUERCUS BICOLOR)

- It is not a large tree, typically growing to 65–80 ft tall
- Very large range, and can survive in a variety of habitats
- It grows rapidly and can reach 300 to 350 years old
- The bark resembles the White Oak
- In autumn, they turn brown, yellow-brown, or sometimes reddish, but generally, the color is not as reliable or as brilliant as the White Oak can be
- Typically grow under conditions of poor drainage in marshes, swamps, or seepage areas
- Not found where flooding is permanent, although it is usually found in broad stream valleys, low-lying fields, and the margins of lakes, ponds, or sloughs
